Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, drawn to a method of incrementally stretching a sheet material.

Group II, claim(s) 13-21, drawn to an apparatus for incrementally stretching a web with multiple impacts

Group III, claim(s) 22, drawn to a sheet stretched in accordance with the process of claim 1

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The common technical feature in all groups is the plurality of mating surfaces having fins positioned to fit within the grooves of said forming surfaces. This cannot be a special technical feature under PCT Rule 13.2 because the element is known in the prior art. US Patent 5,143,679 (Weber) teaches in figures 2 and 2a: "FIG. 2 is a simplified perspective view of a sequential web stretching assembly of the present invention, said assembly being comprised of two sequentially positioned sets of meshing corrugated rolls. FIG. 2A is a simplified view taken along view line 2A--2A in FIG. 2 and showing the manner in which idler rolls are used to cause the diaper web to

wrap lowermost corrugated rolls.” Weber continues: (column 17 line 42): “...as they pass between the meshing portions of the continuous grooves 23 on lowermost corrugated rolls 21 and the grooved segments 24a and 24b of the first and second sets of uppermost corrugated rolls 25 and 27, respectively.”

3. A telephone call was made to Nancy Klembus on 11 April, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAVID N. BROWN II whose telephone number is (571)270-5497. The examiner can normally be reached on Monday-Thursday 7:30a-5:00p EST.
